SUMMARY

AI Specialist and NVIDIA-Certified Associate (AI Infrastructure and Operations) with hands-on experience in computer vision, machine learning, and data analysis. Skilled in programming and enterprise AI workflows. Experienced in building practical AI solutions for monitoring, predictive analytics, automation, and decision support.

WORK EXPERIENCE

AI Engineer | Ministry of Interior Public Security Nov 2025 - Current

- Integrated a computer vision model with hundreds of campus surveillance cameras to support maintenance and security monitoring.
- Developed a web-based dashboard for viewing AI results, camera statuses, logs, and operational statistics, and managed database records.
- Created Power BI reports and supported data analysis tasks for operational visibility.

AI Coop Internship | Saudia Jan 2025 - March 2025

- Received a recommendation letter for internship performance.
- Built a machine learning model to predict ticket prices using historical data.
- Prepared a Business Requirements Document and demand form for a recommender system based on customer behavior.
- Performed data analysis using Power BI, Power Apps, SQL, and Python.
- Worked with APIs and infrastructure-related tasks to support analytics workflows.

PROJECTS

Camera Cleanliness Monitoring System

- Built an AI-based system for classifying surveillance cameras as clean or dirty, achieving 92% classification accuracy.
- Integrated camera frame retrieval, AI inference, scan logging, manual review, and dashboard reporting into one operational workflow, including model deployment.
- Developed a Laravel/MySQL dashboard showing camera status, scan results, alerts, historical logs, and building-level statistics.

Traffic Light Management Using CNN

- Developed a smart traffic-light system concept using vehicle detection and simulation-based traffic optimization.
- Trained a computer vision model to detect vehicles and used SUMO simulation to evaluate traffic scenarios.
- Applied a rule-based queue manager for signal timing based on vehicle counts.

TECHNICAL SKILLS

- **Programming:** Python, SQL, PHP, Laravel, GitHub, Git
- **AI:** Machine Learning, Deep Learning, Computer Vision, PyTorch, ONNX, scikit-learn, Model Evaluation, Model Monitoring, Generative AI Concepts, Responsible AI & Governance, AWS AI Services (Foundational)
- **Data Analysis:** Power BI, Power Apps, Microsoft 365, MySQL, APIs, Scripts
- **MLOps & Cloud:** Google Cloud, Vertex AI, Model Registry, Feature Store, CI/CD, Model Monitoring, Docker, Kubernetes, Automation, GPU Infrastructure Concepts, AI Operations, On-Prem & Cloud Deployment

COURSES AND CERTIFICATES

- NVIDIA-Certified Associate: AI Infrastructure and Operations | NVIDIA
- AWS Certified AI Practitioner | AWS
- SCE AI Specialist | Saudi Council of Engineers
- GitHub Foundations (GH-900) | Microsoft
- MLOps on Google Cloud | Google
- Containers w/ Docker & Kubernetes | IBM
- Machine Learning in Production | DeepLearning.AI
- Laravel & PHP Full-Stack Development | Board Infinity

EDUCATION

Bachelor's in Artificial Intelligence Oct 2020 - Jun 2025

University of Jeddah

LANGUAGES

Arabic (Native) • English (Professional)
